1 Introduction

1.1 Purpose

The purpose of this document is to highlight the features and the requirements that our web application facilitates for anyone who has a duty in Misr International University that can take a break and choose a drink. Our web application is built using Html, CSS, Php, Js, MySQL.

1.2 Scope

Our web application is targeting the Misr International University students and staff. Let them choose their favorite drink with the extra options they want to add and also see the ordered history. And see the menu with varieties that will serve them to have a drink.

2 Test Scenario X

- **Buying a product:**

1. Open the web application using a Mobile Phone or PC.
2. Register by entering the user personal information like (FirstName, LastName, Email, etc..)
3. Sign in the web application by using the username and password the user entered before in the registration step.
4. Choose category of drinks user wants in the filter items menu.
5. Choose the drink that the user wants and press order now.
6. See information about the drink and its ingredients.
7. Choose the specific options for the drink from the Extra Options menu.
8. Add the drink to the cart.
9. Continue shopping and see other drinks or checkout directly.
10. Sign out of the web application.

- **Reordering:**

1. Sign in with the user information that was registered by it before.
2. Go to the navbar at the top of the screen.
3. Choose the order history from the navbar.
4. See all the ordered history before.
5. Choose the drink you ordered before.
6. Press order again and checkout.
7. Sign out of the web application.

2.1 Test Cases
